

**METHOD FOR DECREASING DEPRESSION BY INHIBITING THE
ACTIVITY OF N-TYPE CALCIUM CHANNEL**

ABSTRACT OF THE DISCLOSURE

5 The present invention relates to the method for decreasing depression, more particularly to the method for decreasing depression by inhibiting the activity of N-type calcium channel. According to the present invention, inhibiting material of N-type calcium channel activity can effectively be used for the depression remedy. Also, anti-depression reagent can be screened using N-type calcium channel.
